

TENNEDY, General
(Deering Division)

WRINGERS

is and Churns—Many
len Implements

It has enjoyed a rapid growth in the industrial world industry that manufactures wringers, washing machines, egg crates, and fifty men are employed in the business, and the usual round \$1.00 a week and cents. The work is like \$35.00 for a year. The first in 1897. The first year \$300 at the very

aged in the man- ufacture of wood- users of coal for working material. hat the rate char- ge of their fuel, and is so reasonable find as good a lo- t one of the great work turned out is are sure of still in the next few alone on which is worth three the whole indus- tried twenty-five as well for Ham-

se machines has einge in the last untities which have since been char- acteristic of Hamilton. Is worthy of machine. It now minutes to saw to bring their raw material farther, and longer distance, than they would were they located somewhere else. And for this reason they prefer Hamilton to any other city in the Dominion of Canada.

These firms have large 1908 orders in, and will be compelled to run their mills to their fullest capacity in order to meet the demands for the products of all three factories.

Over and above the number of wom- en and girls employed by the cotton factories, they keep in the neighbor- hood of one hundred men who are ma- chinists; these men all draw go- wages.

The shipping facilities were greatly responsible for these plants locating here, and since Hamilton has kept pace with all other Canadian cities in this respect, there has been no reason for them to look for a change in location. These advantages are yearly increas- ing so far as Hamilton is concerned.

What man must have his glass before he can do his day's work? A glazier.

INDUSTRY IN HAMILTON

industries is arising from the cost of production | are common in fact. e as their

trouble in finding "ready-to-wear" clothing that had been made in Ham- ilton. For there are few civilised coun- tries to-day where this great industry has not made a bid for "their share of business, and we can only state that they have been successful in their ven- ture, and the "ready-to-wear" garment makers of Hamilton are enjoying a business far ahead of any former year.

The output last year was in dollars and cents, \$4,000,000. Ten years ago there was not that amount of clothing business done in the whole Dominion of Canada.

One of these firms has been in Ham- ilton for a period of fifty-five years. The others from twenty to thirty years. And the men who had invested their money in the business at that time state that the volume of money turn- over in the first ten years was not as great as that of last year, which was the banner year for Hamilton whole- salers in most all lines of business. Four million dollars worth of clothing were sold last year. At the time of the founding of this business 300 men could do all the work that was turned out. Last year 1,600 men and women were given employment in this great indus- try alone. The wages paid these people are the very best, and in low amount- ed to \$1,000,000 or a weekly pay-roll of over \$19,000.

These figures do not include 19 tail- oring establishments which employ 30 more men, at wages much higher than in the near future.

Thirty-five years ago, when these textile firms first located in Hamil- ton, there was little or no prospect of sales as were reached in 1907. The great confidence of the promoters, who saw, even then, the phenomenal oppor- tunities which have since been char- acteristic of Hamilton, is worthy of note. These firms can produce goods cheaper and better, although compelled to bring their raw material farther, and again ship their made-up cloth a much longer distance, than they would were they located somewhere else. And for this reason they prefer Hamilton to any other city in the Dominion of Canada.

These firms have large 1908 orders in, and will be compelled to run their mills to their fullest capacity in order to meet the demands for the products of all three factories.

Over and above the number of wom- en and girls employed by the cotton factories, they keep in the neighbor- hood of one hundred men who are ma- chinists; these men all draw go- wages.

The shipping facilities were greatly responsible for these plants locating here, and since Hamilton has kept pace with all other Canadian cities in this respect, there has been no reason for them to look for a change in location. These advantages are yearly increas- ing so far as Hamilton is concerned.

art glasses, the kind you see in all churches and costly dwellings. They deal in the common sheet "in- dow glass, and the large heavy plate glass used in store and office fronts. This work, excepting the sheet glass, is all of a high class and artistic na- ture, requiring the best of skilled work- men. In fact, the men who are cap- able of designing and constructing fine art glass patterns are few indeed, they accordingly receive large salaries.

This industry was first started in Hamilton in 1806. At that time three men could make all the glass and mir- rors that were sold. In 1907 they em- ployed five more skilled workmen, who were kept busy during that year. Since then they have been going along at about this same rate, until about a month ago, when the management re- ceived a few large orders that were from an wholly unexpected quarter. These additional orders forced them again to seek more help.

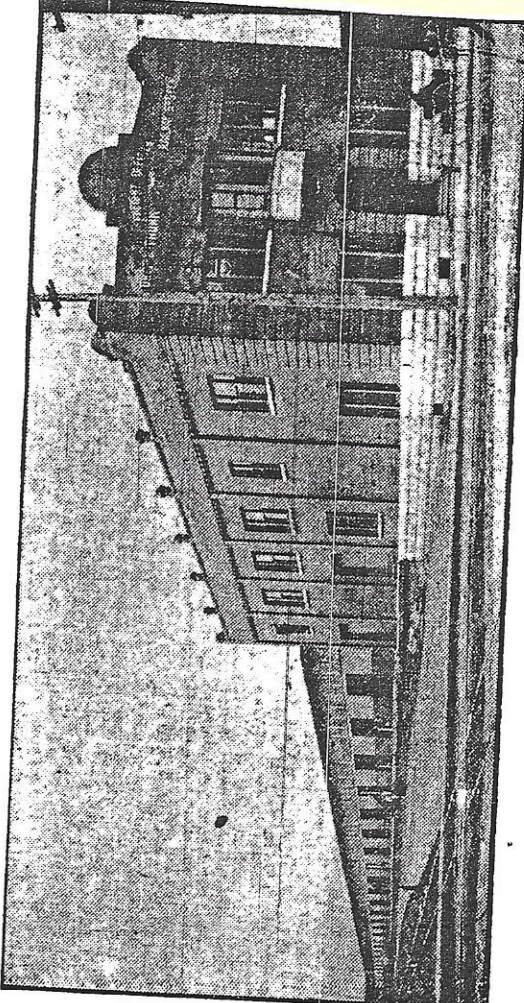

The art glass and glass mirror busi- ness will be one of Hamilton's chief industries some day, because the peo- ple all over the Dominion are begin- ning to use more of these goods year after year.

The business in 1907 amounted to \$20,000, as compared to only \$12,000 for 1906. Already over \$60,000 worth of work is ordered for 1908, and this is by no means the busy season of the year for this industry. In 1906, when starting, the stock on hand, machinery, buildings and everything connected

with the business was worth only \$30,000. You could not purchase it now for \$75,000.

A visit to the factory, where this glass is made, is well worth your time, for "aw places" of art are more inter- esting (one cannot help admiring everything, and especially the work- manship on the different pieces of work.

DEATHS AND FUNERALS

CALEDONIA
STATION FIRE
HS 23 MAY 1908

Following an illness of some duration, Miss Mary Cashman passed away last night, at the home of her brother-in-law, Michael Doyle, 117 Bay street south. Deceased was well known and had many friends who will regret to learn of her demise, which, however, was not altogether unexpected. Besides Mrs. Doyle, she is survived by one brother, Michael Cashman, of Battle Creek, Mich. The Cashman will take place Monday morning at St. Joseph's church, thence to Holy Sepulchre cemetery.

GEORGE MILLER

George Miller died last night at the City Hospital. The deceased came here from Burford and submitted to an operation, which, however, failed in the desired effect. The remains were sent to his home in Burford this afternoon.

WAS OF SPECIAL INTEREST

The Empire day program at the King Edward school proved of more than usual interest. In addition to the songs and recitations given by the scholars, an illustrated lecture, Across Canada, was given by Adam Brown, assisted by Capt. Hardy. Starting with a man-o'-war at Halifax, Mr. Brown told of the extent, wealth and natural resources of Canada, while Mr. Hardy showed views, more particularly along the line of the Canadian Pacific railway. The address and views were much enjoyed.

JUDGMENT RESERVED

Judge Monck at the division court sitting yesterday morning reserved judgment in the appeal of Harry James against the magistrate's fine of \$2 for being drunk. The appeal was made on the ground that there was no offense, that Mr. James was not under the influence of liquor.

NOTICE

Is hereby given that the Council of the Corporation of the City of Hamilton, in pursuance of the provisions of the Municipal Act, intend to open up and grade King William street from its present terminus east of Sanford avenue to Arthur avenue, at an estimated cost of \$1,500.00, fifty per cent. of such cost to be borne by the City and to assess the real property immediately benefited by the opening up and grading of said portion of King William street, unless a petition against the same signed by a majority in number of the owners representing at least one-half the value of the real property to be assessed, is presented to the said Council within one month from the last publication of a notice, which will be on the 30th day of May, 1908.

A statement showing the lands liable to and proposed to be specially assessed for the opening up of the said portion of King William street and the names of the owners thereof, as far as the same can be ascertained from the last revised assessment roll and otherwise, is now filed in the office of the Clerk of the Municipality and is open for inspection during office hours.

A Court of Revision will be held at the City Hall at 8 o'clock p.m., on Friday, the 3rd day of July, 1908, for the purpose of hearing complaints against the proposed assessment or the accuracy of the frontage measurements or any other complaint which the persons interested may desire to make, and which is by law cognizable by the Court.

S. H. KENT, City Clerk.

FINCH BROS. 29 AND 31 KING STREET WEST

CALEDONIA

From Our Own Correspondent.

Caledonia, May 22.—The citizens of this place are very indignant at the action of the Grand Trunk railway in not making any move towards replacing the station that was burned last November.

The Caledonia Lawn Tennis club are putting their three courts in shape this week and expect to begin practice at once. A number of new members have joined this year.

Final arrangements were made for the Victoria Day celebration here next Monday. The committee in charge have left nothing undone to assure all those that attend having a good time. A baseball match, horse races, fancy drill, calathumplings, vaudeville shows, concerts by two excellent bands and other features will make up a day that anyone could enjoy.

There is good fishing in the Grand river just now.

The exterior of the Union hotel is to be painted at once.

The work on the new ice cream parlors of R. Seidon is progressing rapidly and will be a great improvement to that part of Main street when finished.

LANDS COMMISSION NEEDED.

Montreal Star.

The treatment of the timber, grazing and coal lands of the west under the Sifton regime had, at all events, the misfortune of presenting coincidences which excite suspicion. Mr. Ames has pilloried many of these suspicious transactions in the past that the country has become, perhaps, too complacently familiar with them; but the more deeply the probe is pressed, the more fully do those who are following the affair become convinced that there ought to be a fearless and unsparring enquiry into the entire business. Nor need such an enquiry be without result. If it can be established that our western lands were sold in large quantities under conditions which amounted to a conspiracy against the public weal, the sober judgment of the country would support a reversal of such dishonest sales, and a return of the lands to the possession of the nation. It is never too late to do justice.

There are a number of varieties of corns. Holloway's Corn Cure will remove any of them. Call on your druggist and get a bottle at once.

SENTENCED TO DIE ON AUGUST TWENTY-FIRST

(Continued from Page 1.)

criminal instincts, and a person likely to commit crime from mere badness of heart. On the contrary, with the single exception of the present case, your record in Canada as far as I know, is that of a law abiding, industrious citizen. It is further to your credit that you have proved an affectionate and true son, sending to your father and mother in Italy a substantial part of your earnings for their support. And into these circumstances the fact that you have scarcely reached manhood, being now only 20 years of age, makes it especially deplorable that you should have yielded to evil thought for the moment, and that for such you must pay to society the forfeit with your life.

"The laws of Canada allow no one to take the law into their own hands, and from this sentence must all take warning not to carry knives or other weapons on them, that in the heat of passion might be used to injure fellow men.

HELD OUT NO HOPE.

"It is not for me to hold out any hope that the extreme penalty will be interfered with by executive authority, the only authority that can moderate the rigors of the law. I would beseech you to devote the time remaining to you on this earth, with penitent heart to seek forgiveness from Him who is the father of all goodness and mercy. The jury, having found you guilty, it is now for me only to name the day when the punishment provided by statute shall take effect. Your counsel has represented to me that your parents wish to come to Canada to take Yarewell, and because of their limited means, delay may be looked for in the making of necessary arrangements. He has urged me not to appoint a time earlier than August 21, and I have decided to accede to his request.

THE DEATH SENTENCE.

"The sentence of the court upon

you, Giuseppe Greco, for the crime of which you have been convicted, is that you shall be taken hence to the place from which you came, and there remain until the twenty-first day of August, 1908, and you shall then be taken to the place of execution, and be hanged by the neck until you are dead. And may God have mercy on your soul."

Chief Justice Mulock could scarcely pronounce the last words, and the stillness of the court room was such that the fall could have been heard. The rope was taken away and the death watch was placed on him in his cell at the jail. His counsel, M. J. O'Reilly, will take the earliest opportunity of asking an appeal for a new trial or to get the sentence commuted. The Greco scene ended the spring assizes of 1908, and after it was over, Sir William Mulock said that he never wanted another murder trial.

THE GOLF TOURNAMENT

At the Golf club tea yesterday Mrs. Myler and Miss Treggat were hostesses. Among those present were Mrs. Frank Glasco, Miss Clara Cramer, Mrs. Lott, Mrs. Ridge, Mrs. Collins, Mrs. Beasley, Mrs. Ridge, Mrs. Bostwick, Mrs. W. A. Stewart, Mrs. Braithwaite (Toronto), Mrs. Harley Brown (London), Mrs. C. S. Scott, Mrs. W. Wood, Mrs. Abbott, Miss Eugenie Gibson, Miss Meta Gibson, Miss Margaret Scott, Miss Evelyn Cox (Toronto), Miss Muriel Hoodless, Miss Wiggins, Mrs. Miss Phoebe, the Misses Harvey, Miss Christie (Ottawa), Miss Cranham, the Misses Howell and many others.

THE GIRLS' HOME

After Adam Brown's very interesting lecture to the children at the Girls' home, the children asked the children if there anything that they specially wanted. They replied with one accord, "A swing." So Mr. Brown, went to work and collected sufficient money for a swing, which has been put up in the playground and is delighting the hearts of the children.

Brantford Society

A charming house wedding took place yesterday afternoon at the home of the bride's mother, Mrs. Howell, William street, when her second daughter, Edna, was united to Owen Martin, formerly of this city, but now of Montreal.

The house was tastefully decorated for the occasion with a profusion of flowers and palms. Promptly at half-past three and the bride and groom, with their bridesmaids and groomsmen, entered the dining room to the strains of Mendelssohn's "Wedding March," which was beautifully rendered by David L. Wright. The bride looked lovely in her bridal gown of white crepe de chine, and carried a bouquet of white roses. Miss Muriel Howell made a very attractive bridesmaid, while Harry Winters, of Toronto, performed the duties of best man. The nuptial knot was tied by Rev. S. J. Farmer, of the First Baptist church. Many costly and out glass presents were received. Noticeable among them was a handsome piece of cut glass presented by the choir of the First Baptist church, of which the bride was a popular member. After a brief honeymoon Mr. and Mrs. Martin will reside in Montreal.

A quiet wedding ceremony was solemnized at the Methodist church, Hamilton, yesterday afternoon, when Rev. Dr. Williamson performed in marriage Miss N. D. Hyland, of Bartonville, and John F. Healy, of the County Inspect staff of this city. Only the immediate relatives of the contracting parties witnessed the ceremony. Miss Leitha Hyland, sister of the bride, was bridesmaid, while W. Schow performed the duties of groomsmen. After the ceremony Mr. and Mrs. Healy left on a short honeymoon trip, and on their return will take up residence in Brantford.

THE CHILD'S EDUCATION.

What is education, after all? Is it a matter of how to make the child of one's powers, how to arrange a store, how to exert a sweet quiet and magnetic influence throughout life, over all whom one meets? If an advanced education does this for

GALEDONIA

From Our Own Correspondent.

Caledonia, June 9.—Thomas Pattison, of this place, died on Friday last of pneumonia, after a few days' illness. Mr. Pattison was 34 years of age and was well known and a great favorite in town. He will be greatly missed. He was very fond of sports, and was president of the local baseball club at the time of his death. Interment took place on Sunday and was one of the largest funerals ever held here.

The work on the new granolithic walks on the main streets of the town was begun on Monday last and will be rushed to completion.

The plans for the new G.T.R. station here are out and show a very handsome building 100 feet long. It is reported that the G.T.R. intend taking up the Port Dover track and running trains on to the main line west of the old station; also building the new station on the south side of the Goderich and Buffalo track about where the water feeder now stands.

Miss Campbell, of the high school staff, has succeeded in obtaining the degree of Bachelor of Music from the Toronto College of Music.

The work of building the rural lines of the local Independent Telephone Co. will be resumed on Monday next.

The union Sunday schools of the county are holding a large demonstration here on July 1.

Face ache, cramps, sprains, bruises and pains of all sorts are instantly cured by Merrill's Wizard Lightning. All druggists. Price 25c.

DEATH AT 108.

A link with Burke and Hare, who opened graves and committed murders, supplying the bodies to medical men, has been removed by the death of Miss Anne Croshaw, who was probably the oldest woman in Scotland, she being in her 108th year. She died in Wallacestone, Shirlingshire, where she had lived for many years. Miss Croshaw's father, Joseph Croshaw, was a miller at Jamnath, near Slamanian, and one day he left for Edinburgh and never returned. There was strong evidence that he was one of Burke and Hare's victims, for he was seen in their company.

SPRING RECIPES.

Spring croquettes combine potatoes and spinach in a novel way. Wash, pare and cook potatoes in boiling salted water to cover, drain and force through a potato ricer, there should be two cupsful. Add two and one-half tablespoonfuls of butter, the yolks of two eggs slightly beaten, and one-fourth of a cupful of finely chopped onion and salt. Mix thoroughly, and season with salt and pepper. Shape in the form of croquettes to represent eggs, dip in flour, egg and crumbs, fry in deep fat, and drain on brown paper.

Spinach will keep its green color if cooked in an uncovered vessel in a large quantity of boiling water to which salt, powdered sugar and soda are added. Half a peck of spinach requires two quarts of water. Cut in one care for the novelty of it, let me go into detail. Cook canned artichoke bottoms in chicken stock to cover ten minutes; drain, cool, marinate with French dressing, cover and let stand one hour. Arrange on small nests of crisp lettuce leaves, and mound with grapefruit pulp which has also been thoroughly chilled and marinated with French dressing. Pour over all a French dressing, and garnish with strips of red pepper. In the dressing on this salad use red wine vinegar and paprika.

There can be no daintier concoit to pass with a salad course than toasted fromage rolls. Cut fresh bread while still warm in as thin slices as possible, using a very

THOMAS. C. V

CALEDONIA STATION FIRE

HS 24 JUL 1908

Preparations at Fort William to Handle Crop

Fort William, July 23.—Prospects for a rush fall were never better in Fort William than at present. With only eighty miles of double tracking between here and Winnipeg to complete, the C. P. R. is preparing to move a greater amount of wheat than ever before in its history. It will no doubt break all records in handling grain. In the fall of 1905 the C.P.R. made a record of moving an average of 40,000 cars for 77 days, a feat never before since equalled on this continent. A single track railway in the world. With 30 miles of the same double-tracked this fall the moving company are looking for an average of 600 cars per day, and the high officials of western Canada are heard to say only recently that if there were not an average of 600 cars daily between Caledonia and Winnipeg for a period of 77 days he might reasonably expect to see another man fill the shoes. Terminal facilities at Fort William will be increased by the addition of a new working house, the addition of D. which has been out of service for two years. The contract with the company erecting this, which is the largest it will be capable of handling 400 cars every twenty-four hours, and the railway company has a big bond from the erecting company to that effect.

The C.P.R. is this year spending \$250,000 in improving the terminals here, and still it is not content. Plans for an entire rearrangement of terminals at this port are now in the hands of the operating officials. It will still more than double the capacity, and is estimated to be equal to handling the wheat crop of western Canada for the next thirty years.

Elsewhere in this paper will be found a display advertisement that should interest everyone who is desirous of winning some large cash prizes. It headed "Life Annuity to the Winner. You can be sure it is quite genuine."

GALT'S WAR ON WEEDS

Galt, Ont., July 23.—The police to-day acting under peremptory orders of the council, entered on a vigorous enforcement of the by-law providing for the destruction of weeds within the municipality. Action of weeds, whether of high or low degree who are offenders against the by-law have been notified to cut the obnoxious vegetation forthwith, or else the work will be done for them by the corporation, which is charged up against the property. The crusade will not be abandoned by the authorities until the whole town is rid of the weed nuisance. A good deal of feeling has been aroused by the sudden and determined action taken.

HORSE ATTACKED GIRL

Woodstock, Ont., July 23.—Last night, about 6 o'clock, Bertha Rogers, aged ten years, who lives with her mother, Mrs. Bertha Rogers, on the farm of E. W. Lick, near Swenburg, commenced patting an old horse in the pasture, as she was often wont to do. The animal suddenly attacked the little girl. The child's face was badly torn and lacerated by the horse's teeth, her lip and cheek being fractured. Her mother who ran to the rescue, and the little one was carried into the house and Dr. Rogers called. She will be badly disfigured, but will recover.

he has been delayed by some accident to his boat.

Mrs. Stanley, a middle-aged lady, of Baltimore, Md., who has resided in Cobourg for several seasons, died suddenly of heart failure at her residence there. She had been down street in the morning. Her death occurred without warning, in the presence of a few friends in the afternoon. Two daughters were with her at the time. Her husband and a son survive her.

CALEDONIA

From Our Own Correspondent.

Caledonia, July 23.—The Caledonia baseball team kept up its string of victories yesterday by defeating the Stars of Brantford by the score of 11 to 2. Brantford tried out two pitchers, but both were easy picking for the local sluggers.

Miss Lizzie, third daughter of Mr. and Mrs. John Lawson, was married in the Presbyterian church here yesterday by Rev. Mr. Wallis, to A. Sell, of Toronto. A reception was held at the home of the bride after the ceremony.

The local baseball team will play the strong nine of Niagara Falls on the date of the high school excursion next Wednesday, at Victoria park, Niagara Falls. The locals will take along their strongest team, as the Falls team have a good reputation.

The wife of Thomas Kennedy, of Seneca, died very suddenly at her home this morning. Heart failure was the cause.

The citizens' band gave a delightful concert in the town park to a large crowd of citizens. These concerts are very enjoyable and will be kept up weekly throughout the summer.

The Independent Telephone company installed ten more rural phones last week. It is expected about 150 farm-phones will be installed this summer in this section.

Work on the new station for the G. T. R. at this place was begun Monday. The work of grading and shifting the Port Dover track on to the main line will be the first work undertaken.

FRONT SEATS NOT FORBIDDEN

Ottawa, July 23.—The railway commission does not propose to give a ruling regarding the right of street railways to allow passengers to sit on the front seats of open trolley cars, a question which has been agitated since the accident on the Ottawa and Britannia street car line, which resulted in the injury of a score of people. Instead of making a ruling the commission has addressed a letter to the street railway companies suggesting that motormen be forbidden to talk to passengers. Since the accident women and children have not been allowed to ride on the front seats of open cars in Ottawa.

Rub your back with Merrill's Wizard Lightning—cures weakness and amnesia in an hour. All druggists. Price 25c.

RAIN INJURES WELLAND CROPS

Welland, Ont., July 23.—The wheat crop in Welland county has been practically destroyed by the incessant rain of the past ten days. It is estimated that not more than 50 per cent of the crop will be threshed in good condition. The wheat sample this year was unusually good and until a week ago Monday the prospects were excellent. Rain every day since and intermittent spells of unusually hot weather have caused the grain to grow in water shock and much of it is now so matted together that it can scarcely be separated. The loss will run into thousands of dollars.

DISSOLVED INJUNCTION

Toronto, July 24.—The injunction issued two weeks ago at Osgoode hall on behalf of the Red Book Magazine Publishing Co.

RAILWAY'S MOVE CAUSING ALARM

City Engineer Threatened G. T. R.
With Injunction

Company Started to Lay Switch
West of Ferguson Ave

Wants to Handle Express Business
From the H. G. & B.

The commencement by the Grand Trunk railway officials of the work of putting in a siding at the King street station resulted in City Engineer Barrow hurrying to the scene this morning and threatening to call in the police should the workmen attempt to open up Main street. Certain phases of the company's move are not quite clear and those in the know are not inclined to say anything for publication. This morning a gang of men was sent to the Ferguson avenue station and tore up the station platform. They brought ties and rails along with them and commenced to construct a track just west of the present rails. Word reached the ears of the city authorities, and it was feared that the company intended to connect the new track with the H. G. and B. railroad. City Engineer Barrow hurried down about 9:30 and informed the foreman that should he attempt to make a connection with the electric line without the city's consent the police would have to be called in. The foreman told Mr. Barrow that his orders were simply to lay a track parallel with the existing one in front of the station and that he had received no orders to connect with the H. G. and B. The engineer then left, after having been told that the company intended to make an application to the railway board for permission to connect its siding with the electric line.

The civic authorities are powerless to act as far as the work has gone. Mr. Barrow says that the company has the right to construct a siding on its own property if it does not trespass on city property. The foreman said his instructions were to stop the siding about 30 feet north of the freight shed. If the railway board grants the application for a connection, the work can be continued.

PROPOSED CONNECTION
TO H G & B R

HS 25 AUG 1908
1/2

...of the station and that he had received no orders to connect with the H., G. and B. The engineer then left, after having been told that the company intended to make an application to the railway board for permission to connect its siding with the electric line.

The civic authorities are powerless to act as far as the work has gone. Mr. Barrow says that the company has the right to construct a siding on its own property if it does not trespass on city property. The foreman said his instructions were to stop the siding about 30 feet north of the freight shed. If the railway board grants the application for a connection, the work can be proceeded with and the city would be powerless to interfere.

It is believed that the siding is being built for the purpose of transferring express business from the H., G. and B. to the G.T.R. One city hall official stated this morning that it was the intention of the railroad company to place two railway express cars at the station and team the fruit to them from the electric cars. He did not think the company purposed going ahead at once with the scheme of making a rail connection with the electric line and said that the city would not stand for Main street being opened up.

The transfer of the express business in this manner recalls the interesting time the H., G. and B., the G.T.R. and the two express companies had some time ago, when the G.T.R., which handles the Canadian Express company's business, bought out a controlling interest of H., G. and B. stock for the purpose, it was understood at the time, of taking the express business away from the Dominion Express company, which is controlled by the Canadian Pacific railway. The G.T.R. company later re-sold its controlling interest to the Cataract Power company. Just what connection this latest move has with the express business of the two companies is not definitely known.

Col. Gibson, when seen this morning, said that if the G.T.R. company wanted a connection with the H., G. and B. it would have to settle with the city authorities. So far as connecting with the line was concerned, the colonel stated that the G.T.R. company wanted to make a connection and that the H., G. and B. people had no objection. The colonel did not see how this latest development affected the express business, for he stated that the company was bound by law to do business with all express companies.

ELLOWS AT DENVER.
...SESSION OF THE SOVEREIGN GRAND LODGE.

Countries Given Right of Representation in Sovereign Grand Lodge — Chevaliers of Toronto May Carry Home Prize

(Special Despatch to The Globe.)
New York, Sept. 22.—The Sovereign Grand Lodge of the Independent Order of the Odd Fellows is holding its annual session in Denver, Colo., and has brought with it representatives from every State in every Province of Canada, and Commonwealth of Australia.
Ontario Grand Representatives, J. J. Jennings of Palmerston, reports, as presented by J. B. Conwell of Chicago, and Secretary, John B. Good, the marked growth and prosperity of the organization. A net increase for the year ending December 31, 1908, has brought the total membership to over 1,800,000.
The Sovereign Grand Lodge, only amendment to the constitution was not voted down was that foreign countries an integral part of the body, thus admitting the person of C. T. Clarke of W. J. hereafter, Denmark, and Australia will have the right of representation in the Sovereign Grand Lodge with votes according to their number. At present the delegation from these countries have the privilege, but no word in making the election of officers.
Only other amendment proposed was that which caused anything of a stir in its adoption was the proposal to limit the age limit for membership in the order from 21 to 18 years. This was a close and overwhelming majority. The constitution of the order prohibits the admission to membership of any saloon-keeper, bartender, and it was proposed to ban to manufacturers of, or dealers in, liquors, but this proposal was voted down.
The only contested office at the Grand Lodge was in which W. L. Kuykendall of Wyoming lectured upon the fourth ballot. The officers elected were: Grand Secretary, Goodwin, Baltimore, Md.; Grand Treasurer, M. Richards Mucks, Philadelphia; Grand Master, H. C. Edgar, Preston, Ont.
The Grand Lodge will be in session here, and to-day completed a great parade takes place to-morrow. A great parade takes place to-morrow. A great parade takes place to-morrow.

Mrs. Frances Caldwell Walked From Oyster Bay to Sagamore Hill, Only to Be Turned Back by Detectives.

(Special Despatch to The Globe.)
New York, Sept. 22.—President Roosevelt ended his vacation at Oyster Bay this morning and started for Washington, where he arrived to-night. The trip down the East River and around the Battery to Jersey City was made without incident, and as the President walked from the boat through the Pennsylvania train shed a crowd of several hundred persons cheered him.
In the crowd was Mrs. Frances Caldwell of Toronto, who, carrying her three-year-old baby, walked from Oyster Bay to Sagamore Hill a week ago in an effort to see the President and tell him some grievances. She was sent away by the secret service men, then, and to-day, when she attempted to intercept the President, a woman.

KING ST.
APPLICATION FOR CONNECTION TO H.B. & B. AT MAIN
DEFERRED
HS 23 Sep 1908

Encroaching on the Streets.
The application of the Grand Trunk for permission to connect its tracks with the H. B. & B. at the corner of Ferguson avenue and Main street was laid before the Board of Works to-night, but action was deferred in the matter. A report was made by City Engineer Barrow to the effect that a number of people in various parts of the city were encroaching on the streets by building their verandahs over the street line. In one instance he stated that a verandah was twelve feet over the line. The board decided to notify those who have so encroached that they will not be given deeds for their property, and the engineer's department will keep a close watch on those who are building. The board will try to make an arrangement with the Cataract Power Company for 150 additional street lamps, under the new agreement, if possible.

A Question of Law.
A charge was laid against Philip Connors in the Police Court this morning of selling cigarettes to a minor, but, as the question arose whether the Dominion or Ontario statutes applied, Magistrate Jeffs laid the consideration of it over till to-morrow. Under the Ontario statutes a minor is a person under 18 years of age, and under the Dominion law the limit is fixed at 16 in such cases. The young man whom Connors is alleged to have sold cigarettes to is over 16. Counsel for Mr. Connors claimed this morning that a rival storekeeper of Connors had given the boy money to buy cigarettes from him in order to trap him.

Held Up Funeral.
An undertaker complained to Mayor Stewart that a funeral of which he was in charge yesterday afternoon was stopped at the cemetery gates while a constable inquired if a certain cabman had a license. He stated that this was not the first time such a thing had happened. His Worship was annoyed over the matter, and instructed Chief Smith to see that no further interference of the kind took place. There has been friction for over a year between the police and the livermen who have cable cars over the license question. The livermen claim that their license entitles them to send out cabs with drivers who have no license, and the police contend that every cabman should have a license. The Police commissioners may be called on to decide the question.

CALEDONIA
NEW STATION OPEN

HS 5 OCT 1908

CALEDONIA

Oct 5 1908

From Our Own Correspondent. 1908
Caledonia, Sept. 30.—Great preparations are being made by the management of the Caledonia exhibition, which takes place on the 8th and 9th of October. Several new buildings have been erected lately and the grounds have never looked better than this year. The half-mile track has also been looked after and greatly improved since last year, and some fast time is sure to be made this year. The entries so far are far ahead of the same time last year and everything points to the "best that has been." The large sum of \$2,750 is being hung up for prizes this year.

The new G.T.R. station was opened to the public to-day and a beauty it is, especially the interior, which is quite up-to-date in every way. Both the platform and the interior are well lighted.

Mr. and Mrs. Wyman, of Chicago, are spending a few weeks here the guests of Mr. and Mrs. Hornbrook, after an extended tour of Europe.

At the last meeting of the town council it was decided to buy six more street lights for distribution in the town, making about 30 lights in all.

The new addition to the Exchange hotel is about completed and adds greatly to the appearance and comfort of this well-known hotel.

F. R. Lalor, the Conservative candidate for Haldimand, was a caller in town yesterday and reports everything in good shape politically throughout the county. The Liberals concede this county to Mr. Lalor, and think it only a matter of majority. A great many think he will double his last majority, which was about 250.

Mrs. Trotter and daughters moved to Toronto the first of the week.
A number from here are attending the fair at Cayuga to-day.

BINBROOK

From Our Own Correspondent.

Binbrook, Oct. 1.—Mrs. (Rev.) W. W. Prudham spent a couple of days of this week in Waterdown.

Mrs. Hislop has returned from a two weeks' visit with Mrs. (Dr.) Jones, of Hagersville.

Mr. Woodhall, of Hamilton, spent Tuesday with his son, Dr. F. Woodhall, at the Maples.

The infant son of Robert Young died on Wednesday morning and was buried on Thursday afternoon at Trinity church

Now, in conclusion, let me give you a simple illustration and an argument for use when the mention as to the value of your grant from a selling standpoint comes before you. The new Dominion lands act offers in addition to the ordinary homesteader an extra 160 acres of land in a certain area. On this additional homestead or pre-emption the settler has to perform duties, and he pays the government the extremely low price of \$3 an acre. On the veterans' grant of 320 acres he has only to do duties equivalent to the 160 acres ordinary homestead requirements. Therefore as a basis of value for mere selling purposes his right to the additional 320 acres is worth more than the nominal government price of a pre-emption, \$3 an acre, or \$960 in all. But when it is considered that with six months' residence in each of three years, and cultivation, all of his holding becomes worth from \$10 to \$16 or \$20 per acre, one can readily realise that the selling value of the veteran's land grant of 320 acres is actually worth in cash at the present time from \$5 to \$7 an acre. This western veterans' association extends their greetings to their comrades in Eastern Canada and elsewhere, and will be glad to give any further information or assistance within their power.

BEST FOR BOWEL TROUBLES

They effect people in the winter, too; in the one case due to improper eating, in the other too congested condition excited by cold. Quite easy to cure these troubles if the right remedy is used. Very small doses of Nerviline repeated every hour, or two remove any sense of discomfort. If there is pain, relieves it immediately.

Nerviline treats causes, that's why it never fails to cure. Not a pain or an ache, not a bruise or uneasy feeling that's not quickly cured by Nerviline. Hundreds of thousands of 25c bottles sold every year.

DEATH OF L. V. PERCIVAL

Toronto, Oct. 5.—Lionel Vernon Percival, clerk of bonds in the treasury department of Ontario, and previously for many years private secretary to the treasury, died at his residence, Saturday morning. He was born in Bristol, England, and had recently returned from a visit to his old home and friends, which it was hoped might benefit his falling health, but a sudden attack of illness ended these hopes. He was a most brilliant writer and teacher of shorthand, and had invented a successful system of his own.

CALEDONIA

OCT 22 1908

From Our Own Correspondent.

Caledonia, Oct. 21.—The election cam
paign is very quiet here. The Reformers
are apparently doing very little, as they
concede the Conservatives with Lalor will
win hands down, and look upon it as only
a matter of majority. Some think Lalor
will have as high as 400 over. Mr. Miller,
the Reformer, Mr. Lalor, assisted by J.
A. Ross, M.E.A., and Dr. Jacques, hold
a meeting in the Opera house here Thurs
day evening.

There is a great scarcity of water in
town owing to the continued drought.
Nearly all the cisterns in town are
empty.

The arbitration case of W. H. Howard
vs. the Corporation of Caledonia for in
juring the front of his property when
laying the new cement walks recently,
was decided in favor of Mr. Howard by
the court, and he was awarded \$200 and
all costs.

A new two horse-power gas engine
has been placed in the Banner office to
run the press in place of by hand as
formerly.

The G.T.R. has placed gas lamps on
its platforms at the new station here,
which is greatly appreciated by the tra
veling public.

The handsome new residence of Roy
Winger on Sutherland street east is
nearing completion.

W. H. Howard is in Cobalt district this
week looking after some mining property
he has in that section.

An excellent vane of plaster about
seven feet thick was discovered yester
day on the farm of Robert Holstein.

EAST END REVIVAL

Another large crowd gathered in Bar
ton street Methodist church last night
to hear the Chapman-Alexander evang
gelists, Toy and Dickson. A bright song
service was begun at 7.45. Mr. Dickson
sang, The Gates Ajar. Rev. H. G. Liv
ingstone led in prayer. Evangelist Toy
chose as his text the well-known passage
in St. John's, "As Moses lifted up the
serpent in the wilderness, so must the
Son of Man be lifted up." He delivered
one of the strongest sermons of the
series. At the close several decided for
Christ. There was a large attendance in
St. Andrew's Presbyterian church yester
day afternoon. To-morrow Dr. Toy will
speak in St. Andrew's church in the af
ternoon on, The Holy Spirit. A large
mass meeting of men will be held in
Barton street church on Sunday after
noon, at 4.40. All men invited.

have been thrown from his position.
lying close to the hot boiler with noth
ing to hold on to but the running
board, the tramp passenger had a
unique and exciting ride. When taken
in charge by the detective he gave his
name as John McGinley and said he
came from Toronto. In the police court
this morning he pleaded guilty to a
charge of trespass and was fined \$5
and costs.

WILL LIVE APART

The combined conciliatory efforts of
Kerwan Martin and George S. Kerr,
K.C., were successful in smoothing
over the matrimonial troubles of Nellie
and Albert Longworth, 83 York street.
Mrs. Longworth had summoned her
husband for assault, but when the case
was called the lawyers asked for a few
minutes' delay, as an amicable settle
ment was in progress. After the law
yers had conferred with their clients
Mr. Kerr announced that it had been
decided that the two should part, the
wife to have the custody of the child,
excepting on Sundays, when the father
will be entitled to her company, and
the husband to contribute \$3 a week
towards the maintenance of his wife.
The magistrate expressed his willing
ness to the agreement and the case was
dismissed.

A CLOSE CALL

To the Editor—Will you kindly allow
me to remark through your widely
read columns that I wonder people are
not more often killed by the deadly
level crossings than they are. To be
brief—This morning my horse almost
lost his feet upon the T. H. & B. cross
ing on the road above the sulphur
springs, when there was a swishing
sound in the air, merely that and noth
ing more, and down came a long train,
so silently and so fast, neither ringing
its bell nor blowing its whistle, that it
was gone like a flash before I could
realize that I was experiencing the
furious feelings that people are sup
posed to have when they see a ghost
unexpectedly, which may be summed
up as a general inclination to wobble,
and next to wonder what had become
of my dog, who, however, turned up
smiling on the other side of the line.
The point I wish to call attention to
is that trains are supposed to whistle
at level crossings, and that the alarm
bell on the crossing is supposed to go
off when the train is
