

## **A Pitch In.**

A pitch in occurred at Winchester station on the C.P.R. short line road on Thursday night. No person was injured. A way freight was standing on the track when the through freight from Montreal came along and smashed into it. The van and four cars were completely wrecked, and the engine considerably damaged. Engineer Jas. Lewis, who is well-known here, and the fireman of the through freight jumped before the collision and escaped unhurt. The track was blocked for some hours, and in consequence the Toronto train had to come through Ottawa on its way to Montreal.
