## Hamilton &amp; L. E. Company.

## SECOND ANNUAL MEETING.

The second annual meeting of the shareholders of the Hamilton and Lake Erie Railway Company was held in the Company's Board-Room at 12 o'clock. There were present Messrs. James Turner, G. W. Burton, W. F. Findlay, John Miner, G. E. Tuckett, W. J. Copp, E. Gurney, W. Hendrie, Geo. Roach, W. F. Mosey, E. Martin, I. C. Chilman, J. Mitchell, J. M. Williams, and others.

The President, Mr. James Turner, took the chair, and called upon the Secretary, Mr. M. W. Browne, to read the notice calling the meeting and minutes of the last annual meeting, and of a subsequent special general meeting.

The Secretary then read the following

## REPORT OF THE DIRECTORS.

21st MAY, 1873.

To the Shareholders of the Hamilton and Lake Erie Railway Company:

The Directors beg to submit at this the second annual general meeting of the shareholders of the company, the following report:

Since our last meeting the work of construction on the line from its intersection with the Great Western railway at Hamilton to Caledonia, has so far progressed as to warrant the payment to the company of the city bonus of \$30,000, together with the Government aid of \$2,000 per mile for that portion of the line.

The validity of the Wentworth bonus for \$20,000, was tested in the law court, and the by-law being found to be illegal, the company have lost the benefit of that grant.

As you will see by reference to the report of the chief engineer, the work of construction is being pushed forward energetically from Caledonia southward, and the Directors hope ere long to make such arrangements as regards bonuses, as will enable them to complete the line to Port Dover this fall, or early next spring. The township of Woodhouse, yesterday voted upon and carried a by-law granting a bonus to this Company of \$15,000, which grant Port Dover has agreed to supplement by a sectional bonus for a further sum of \$10,000 and a free grant of the right of way in Woodhouse, together with the station grounds in the village of Port Dover.

The agreement with the Canada Southern Railway has been duly executed by that Company, and that with the Great Western Railway Company was, on recommendation of the Directors, ratified by the shareholders, but the formal execution of the agreement awaits the receipt from England of the resolution of the home Board. The agreement with the Grand Trunk Railway Company is still under consideration.

The motive power and rolling stock are of the very best manufacture, and there are now on the line 2 Mogul Baldwin locomotives, 4 passenger coaches, 2 post office, express and baggage cars, 8 box cars and 20 flat cars.

It was deemed advisable, further to amend our charter, and a bill was consequently introduced and passed through the Legislature by our member, J. M. Williams, Esq., in which, besides many other valuable powers, we are authorized to considerably increase the volume of our bonded debt.

Before closing this report, your Directors deem it due, to the memory of the late John Young, Esq., that they should express their high appreciation of his valuable services as a member of this Board.

The Board of Directors retire at this meeting, but are eligible for re-election.

M. W. Browne, JAMES TURNER,  
Secretary, President.  
He then read the Engineer's report.

The President then moved the adoption of the report and explained the nature of the several amendments of the charter procured at the late session of the Ontario Legislature. He announced the adoption of the Woodhouse bonus by-law, and was of opinion that all necessary bonuses could be got without trouble to complete the road to Port Dover, and advised the Board to do so. Mr. E. Gurney, Vice-President, seconded

—This pleasing though slightly personal allusion to Congressman Havens of the Vth Missouri District is published in the newspapers of that State:

Havens was a Congressman,  
Havens was a thief;  
Havens took my bacon pay,  
And I am never to grief.  
The people voted to Havens,  
He wouldn't pay it back;  
The people said to Havens,  
It isn't cheek you lack.

CENTENARY CHURCH SCHOOL FESTIVAL.—The fifth anniversary of the Juvenile Missionary Society was held in the Centenary Church last evening. There was a very large attendance of not only children but adults of both sexes. The chair was occupied by the Rev. Mr. Hunter, who after singing by the choir and prayer, introduced the Rev. Mr. Fletcher and the Rev. Amos E. Russ to the

## SPECIAL TELEGRAMS.

OTTAWA.

Ottawa, May 21.—The news of the death of Sir Leo Cartier fell like a thunderbolt yesterday upon the Commons, as the last mail had announced his intention of sailing next week. The news was telegraphed to Sir John A. Macdonald by Sir John Rose, and was as follows: "Sir George had a relapse last Tuesday, and died peacefully this evening. His body will be sent by Quebec steamer of the twenty-ninth." The Premier announced the news to the House, and Mr. Laing followed in French, but it was desired in the present state of business not to adjourn, but to proceed with matters before the House. The Senate adjourned out of respect to the memory of Sir George.

Sir John announced that he would not press the election bill during the present session, and as they would probably get

will do all to read what they amount of time.

The Grand Trunk Railway Company is still under consideration.

The motive power and rolling stock is of the very best manufacture, and there are now on the line two Mogul-Baldwin locomotives, four passenger coaches, two post office, express and baggage cars, eight box cars and twenty flat cars.

It was deemed advisable further to amend our Charter, and a bill was consequently framed and passed through the Legislature by our member, J. M. Williams, Esq., in which, besides many other valuable powers, we are authorized to considerably increase the volume of our bonded debt.

Before closing this report your Directors deem it due to the memory of the late John Young, Esq., that they should express their high appreciation of his valuable services as a member of this Board.

The Board of Directors retire at this meeting, but are eligible for re-election.

JAMES TERRAN, President.

M. W. BROWN, Secretary.

#### THE ENGINEER'S REPORT.

##### To the President and Directors.

GENTLEMEN:—I have the honor to report upon the various operations connected with the Engineering Department of your Railway, since my report of the 24th of July last.

For convenience these are divided under the heads of Sections or Contracts.

##### FIRST DIVISION—WITHIN THE CITY LIMITS.

The work upon the track of this section has been, so far, only sufficient to enable a junction with the Western Railway to be effected, and of providing an Engine House, Water Tank, Lamp and such temporary shops as are indispensable to operating the road during the time the permanent buildings at the Burlington Bay terminus are being built.

The provision to be made for the city passenger business is considered sufficient for all immediate wants, and that of the freight I beg to leave for your consideration.

The surveys and plans of the extension of the line to the terminus at Land's Inlet or Burlington Bay have been made, and the earthwork laid out ready for actual work thereon whenever arrangements are made for carrying this out.

A general plan of the wharves, the disposition of the various permanent buildings, elevators, freight and engine-houses, and car and repairing-shops, and sidings at this terminus, has been made after much attention to this important point, and I have every confidence that the arrangements proposed in this plan will be found convenient for the transfer to and from the cars, and shipping of very large quantities of freight.

The wharf frontage and siding-room can be enlarged, as occasion requires, to an almost unlimited extent.

##### SECOND DIVISION—CITY LIMITS TO CALEDONIA.

This Division is, as you are aware, unfinished as yet. The rails were laid to Caledonia early last winter, after which, until the beginning of this month, little or nothing has been done, and there is considerable work to do before it can be considered complete.

The contractor—Mr. Plunkett—in a letter dated 20th ult., says: "I have engaged 50 men from Hagersville, and I have advertised to-day in Hamilton papers, also in Toronto Globe to-morrow, for 300 men, at wages from \$1.25 to \$1.50 per day."

The work at the deviation of the line through the Waddell farm, on the Mountain side, is being carried on rapidly, and I hope soon to report that the track here is satisfactorily completed, and made substantial and safe.

##### GRAND RIVER BRIDGE.

The work on this has progressed very satisfactorily. It is under contract with Mr. Alex. J. Brown, both for the superstructure and the completion of the masonry, which was left unfinished at the cancellation of the contract with Mr. Drew for this portion of the Bridge.

The timber for the superstructure of the Bridge, delivered under contract by Messrs. T. & A. Smith, of Ancaster, is excellent in quality, and has been furnished in quantities as actually required by framers.

##### THIRD DIVISION—CALEDONIA TO JARVIS.

The operations on this Division, under contract with Mr. Hunter, and especially on that portion between

violent behaviour. This is a matter referred to before.

THE MENDELSSOHN CONCERT.—Remember that to-morrow evening the Mendelssohn Quintette Club perform at the Mechanics' Hall.

YAH

Concert itself has been held in the hall of the cells, & feeling strum accommulated.

Mr. He

HIN

the audience in raptures.

was not less pleasing. The fantasia for violins on themes from "Massanella," by Carl Nam, was also masterly, and, if such a thing were possible, exhausted the resources of the instrument. This was heartily encored. Mr. Heindl's efforts on the flute were in keeping with the rest. The singing of Mrs. Dow was highly appreciated. Her voice is a pure soprano, clear and bell-like in the medium register, and, though not very powerful, is under exquisitely fine control, exhibiting careful and exact training, especially in the grand scene from "Mignon" and the ballad "Beautiful Bird." She has, moreover, an engaging presence, and a manner which puts her immediately en rapport with the audience. The concert was one of unalloyed pleasure.

##### CENTENARY CHURCH JUVENILE MISSIONARY ANNIVERSARY.

The Juvenile Missionary Society of the Centenary Church held their fifth anniversary last evening. The Church was well filled, the galleries being occupied by the children of the school and the body of the Church by the parents and friends. A little before eight o'clock the Rev. W. J. Hunter took the chair and commenced the proceedings by giving out the old Missionary Hymn, "From Greenland's Icy Mountains." After singing and prayer, followed by a short address by the chairman, the children sang a piece entitled "Work,

for the night is coming." The chairman then called upon Mr. Theodore Crawford, Secretary of the Society, to read the annual report, which showed the membership of the Society to have increased during the past year from 296 to 304; the amount raised for Mission purposes, \$236.95, being an increase also over the previous year of \$1.170. After the reading of the report the children sang a piece entitled "Do what you can." The Rev. D. H. Fletcher was then called upon for an address; he spoke of the rapid spread of Christianity in early time, in spite of vigorous opposition; he described Christianity as a rapidly-increasing flame, surrounded by those who were opposed to it and endeavouring to extinguish it

by attempting to blow it out. He referred to the early martyrs who had died for it, eulogised in glowing terms John Knox, Wickliffe, and the heroes of the Reformation, and concluded by an eloquent appeal to the audience to sustain the great missionary enterprise in which we are engaged.

The children again sang very nicely a piece entitled "Keep to the Right." The Rev. Amos E. Russ, of British Columbia, then addressed the meeting. He referred to the vast extent of the territory embraced in the Province from which he came, described its lofty mountains, beautiful scenery, mild climate, etc. He referred to the large Indian population, estimated at 40,000, and spoke of the great work being accomplished among them. Thirteen years ago there were

#### THIRD DIVISION—CALEDONIA TO JARVIS.

The operations on this Division, under contract with Mr. Hendrie, and especially on that portion between Caledonia and Hagarville, were in a forward state at the temporary suspension of the excavation work in the winter, and since the opening of the season the whole of the section has been pushed on energetically towards an early completion.

#### FOURTH DIVISION—JARVIS TO PORT DOVER.

The complete surveys and plans &c., of the line on this Division are in progress of being made ready for letting the work, should it be determined upon. I have made a careful examination of the harbor at Port Dover, and conclude that facilities for a large transfer business are at hand at this point. The only heavy work on this Division will be found in grading down from the plateau, or level on which the plank road runs, to the level of the wharves at the harbor. The material of the cuttings, however, can be utilized for enlarging the wharves and siding space adjoining them.

The yards or stations at which the Grand Trunk at Caledonia, the Canada Southern, at Hagarville, and the Great Western Railway Air Line at Jarvis are respectively intersected, are roomy, and I believe will be found convenient. Arrangements are being made for the necessary junction, sidings and water supply, together with affording such sites for warehouses as may be required.

The balance of the iron, viz., 450 tons of rails and necessary fastenings required for completing the laying of the track from this city to Jarvis, are now being delivered by Mr. John Procter at a wharf in the city.

I am, Gentlemen,

Yours truly,

(Signed)

A. HASKIN.

The PRESIDENT, in moving the adoption of the Report, had very little to add. He went on to show how the new arrangements authorized by a recent Act would affect the Company and the railways with which the H. & L. E. R. R. would be connected. Provided bonuses were granted he had agreed to finish the line to Port Dover by July 1st, 1874, in order to make a grand coal depot there. Some trouble had been had with the slide on the Waddell farm and in order to see that no further danger may arise from it, some \$3,000 will be expended in making the road bed there permanent, as any accident which might happen would cost more than the fixing up of the place.

Mr. GURNEY, Vice-President, seconded the adoption of the report, which was carried.

A number of questions were asked and answered. The line was represented to be under active construction. Mr. Hendrie stated that the section between Caledonia and Jarvis would be ready for the rails in four weeks. A letter from Mr. Brydges was read, which showed that as soon as it could be done that he would be prepared to run a train from Paris through to Hamilton.

On motion of Mr. COFF and Mr. WILLIAMS, Messrs. Watson and Rutherford were appointed scrutineers.

It was given as a notice of motion that certain shares which had not been paid up as required, should be forfeited, if not attended to.

The scrutineers reported that the following shareholders had been elected as Directors:—Messrs. James Turner, Edward Gurney, John Stuart, J. M. Williams, W. J. Copp, W. F. Findlay and A. F. Skinner. At a subsequent meeting of the Board the old officers were re-elected.

After some votes of thanks the meeting broke up.

CUTTING AWAY.—Some of the trees in Prince's Square are being cut away, among

its lofty mountains, beautiful country, climate, &c. He referred to the large Indian population, estimated at 40,000, and spoke of the great work being accomplished among them. Thirteen years ago there were no churches in that land, now they had twelve white and eight or nine Indian churches, in which they raised last year for church purposes the sum of \$10,000.

Str  
pre  
city of throwing rubbish of all sorts, old tin  
pans, &c., into the streets. If this cannot  
be prevented let the next best thing be done,  
which is to remove the rubbish. In some  
parts of the city it is very uncomfortable, if  
not positively dangerous, travelling for car-  
riages. Is there any good reason why it  
should remain so?

BROKEN.—A team of horses backed a wag-  
gon up against the window of Copland's drug  
store, Market Square, and demolished three  
large panes of glass. Repairs had at once to  
be begun.

MAGAZINES.—Eastwood & Co. have re-  
ceived a second supply of the Young Ladies'  
Journal, Family Herald, Good Words and  
London Society.

FASHIONABLE WEDDING AT WESTON  
SUPER-MARE, SOMERSET, ENGLAND.—The  
marriage of Reginald Cox, Esq., second son  
of John Cox, Esq., only daughter of Eneas  
Sage Kennedy, Esq., of The Wilderness,  
Hamilton, Canada, was celebrated at Trinity  
Church, Weston-Super-Mare, on Tuesday  
last. Long before the hour fixed for the  
wedding, the church was filled to overflow-  
ing by a highly-fashionable congregation,  
and hundreds who were unable to obtain ad-  
mission lined the road between the house  
and the church. The bride—who was given  
away by her brother, Reginald Kennedy,  
Esq.—entered the church at half-past eleven.  
She was elegantly attired in a magnificent  
striped moire, richly trimmed with  
tulle and orange blossoms, and  
veil and wreath to correspond. She  
wore a handsome necklace and earrings pre-  
sented by her brother, and was attended by  
the following bridesmaids: Miss Rush (cousin  
of the bride), Miss Palmer, Miss Scott,  
Miss Norman, Miss Cox (sister of the bride-  
groom), Miss Matheson, Miss Lina Matheson  
and Miss Florence Shepherdson. Their dresses  
were white Swiss muslin, trimmed with tulle.  
The two first maids wore blue sashes and  
wreaths of forget-me-nots. They were fol-  
lowed by three others wearing coral sashes  
and akeleas, and three in white satin sashes  
and water lilies. All eight wore tulle veils.  
The bridegroom was accompanied by his cou-  
sin, Mr. Alfred Drake, who acted as best  
man. The groomsmen were E. Coathups,  
Esq.; Edmund Blundell, Esq.; H. Do C.  
Rawlin, Esq. (90th Light Infantry); J.  
Maitland Reid, Esq.; F. Fisher, Esq.; Rev.  
A. Dring, and Master R. Ferrie (brother to  
the bride). The ceremony was performed by

	It was deemed advisable, further to amend our Charter, and a bill was consequently framed and passed, through the legislature by our member, J. M. Williamson, Esq., & which, besides many other valuable powers, we are authorized to considerably increase the volume of our bonded debt.	
	Before closing this report your Directors deem it due to the memory of the late John Young, Esq., that they should express their high appreciation of his valuable services as a member of this Board.	
	The Board of Directors retire at this meeting, but are eligible for re-election.	
	M. W. Brown, Secretary.	
	<b>THE ENGINEER'S REPORT.</b>	
	To the President and Directors.	
	GENTLEMEN:—I have the honor to report upon the various operations connected with the Engineering Department of your Railway, since my report of the 24th of July last.	
	For convenience these are divided under the heads of Sections or Contracts.	
	FIRST DIVISION—WITHIN THE CITY LIMITS.	
	The work upon the track of this section has been so far only sufficient to enable a junction with the Western Railway to be effected, and of providing an Engine House, Water Tank, Lamp and such temporary shops as are indispensable to operating the road during the time the permanent buildings at the Burlington Bay terminus are being built.	
	The provision to be made for the city passenger business is considered sufficient for all immediate wants and that of the freight I beg to leave for your consider- ation.	
	The surveys and plans of the extension of the line to the terminus at Land's Inlet or Burlington Bay have been made, and the earthwork laid out ready for actual work thereon whenever arrangements are made for carrying this out.	
	A general plan of the wharfage, the disposition of the various permanent buildings, elevators, freight and engine-houses, and saw and repairing shops, and sidings at this terminus, has been made, after much attention to this important point, and I have every confidence that the arrangements proposed in this plan will be found convenient for the transfer to and from the cars, and shipping of very large quantities of freight.	
	The wharf frontage and siding room can be en- larged, as occasion requires, to an almost unlimited extent.	
	SECOND DIVISION—CITY LIMITS TO CALEDONIA.	
	This Division is, as you are aware, unfinished as yet. The rails were laid to Caledonia early last winter, after which, until the beginning of this month, little or nothing has been done, and there is consider- able work to do before it can be considered complete.	
	The contractor—Mr. Plunkett—in a letter dated 10th ult., says: "I have engaged 60 men from Her- kimer, and have advertised to-day in Hamilton papers, also in Toronto Globe to-morrow, for 300 men, at wages from \$1.25 to \$1.50 per day."	
	The work at the deviation of the line through the Waddell farm, on the Mountain side, is being carried on rapidly, and I hope soon to report that the track here is satisfactorily completed, and made substantial and safe.	
	GRAND RIVER BRIDGE.	
	The work on this has progressed very satisfactorily. It is under contract with Mr. Alex. J. Brown, both for the superstructure and the completion of the ma- sonry, which was left unfinished at the cancelling of the contract with Mr. Drew for this portion of the Bridge.	
	The timber for the superstructure of the Bridge, de- livered under contract by Messrs. T. & A. Smith, of Ancaster, is excellent in quality, and has been fur- nished in quantities as actually required by framers.	
	THIRD DIVISION—CALEDONIA TO TAVES.	
	The operations on this Division, under contract with Mr. Hendrie, and especially on that portion between

Ancester, is excellent in quality, and has been fur- nished in quantities as actually required by framers.

THIRD DIVISION—CALEDONIA TO JARVIS.

The operations on this Division, under contract with Mr. Hendrie, and especially on that portion between Caledonia and Niagara, were in a forward state at the temporary suspension of the excavation work in the winter, and since the opening of the season the whole of the section has been pushed on energetically towards an early completion.

FOURTH DIVISION—JARVIS TO PORT DOVER.

The complete surveys and plans &c., of the line on this Division are in progress of being made ready for letting the work, should it be determined upon. I have made a careful examination of the harbor at Port Dover, and conclude that facilities for a large transfer business are at hand at this point. The only heavy work on this Division will be found in grading down from the plateau, or level on which the plank road runs, to the level of the wharves at the harbor. The material of the cuttings, however, can be utilized for enlarging the wharves and siding space adjoining them.

The yards or stations at which the Grand Trunk at Caledonia, the Canada Southern, & Niagara, and the Great Western Railway Air Line at Jarvis are respectively intersected, are roomy, and I believe will be found convenient. Arrangements are being made for the necessary junction, sidings and water supply, together with affording such sites for warehouses as may be required.

The balance of the iron, viz., 450 tons of rails and necessary fastenings required for completing the laying of the track from this city to Jarvis, are now being delivered by Mr. John Procter at a wharf in the city.

I am, Gentlemen,

Yours truly,

(Signed)

A. HASKIN.

The PRESIDENT, in moving the adoption of the Report, had very little to add. He went on to show how the new arrangements authorized by a recent Act would affect the Company and the railways with which the H. & L. E. R. R. would be connected. Provided bonuses were granted, he had agreed to finish the line to Port Dover by July 1st, 1874, in order to make a grand coal depot there. Some trouble had been had with the slide on the Waddell farm and in order to see that no further danger may arise from it, some \$3,000 will be expended in making the road bed there permanent, as any accident which might happen would cost more than the fixing up of the place.

Mr. GURNEY, Vice-President, seconded the adoption of the report, which was carried.

A number of questions were asked and answered. The line was represented to be under active construction. Mr. Hendrie stated that the section between Caledonia and Jarvis would be ready for the rails in four weeks. A letter from Mr. Brydges was read, which showed that as soon as it could be done that he would be prepared to run a train from Paris through to Hamilton.

On motion of Mr. COFF and Mr. WILLIAMS, Messrs. Watson and Rutherford were appointed scrutineers.

It was given as a notice of motion that certain shares which had not been paid up as required, should be forfeited, if not attended to.

The scrutineers reported that the following shareholders had been elected as Directors: Messrs. James Turner, Edward Gurney, John Stuart, J. M. Williams, W. J. Coff, W. F. Findlay and A. F. Skinner. At a subsequent meeting of the Board the old officers were re-elected.

After some votes of thanks the meeting broke up.

CUTTING AWAY.—Some of the trees in Prince's Square are being cut away, among them one of the large old dying willow trees

its lofty mountains, beautiful country, mild climate, etc. He referred to the large Indian population, estimated at 40,000, and spoke of the great work being accomplished among the no churohe two ohu ohu urg oau pla Re sen clas am nat

the GRAND RAILWAY OF CANADA.

Street Commissioner is called to the custom prevailing in some parts of the city of the city of throwing rubbish of all sorts, old tin pans, &c., into the streets. If this cannot be prevented let the next best thing be done, which is to remove the rubbish. In some parts of the city it is very uncomfortable, if not positively dangerous, travelling for carriages. Is there any good reason why it should remain so?

BROKEN.—A team of horses backed a wagon up against the window of Copland's drug store, Market Square, and demolished three large panes of glass. Repairs had at once to be begun.

MAGAZINES.—Eastwood & Co. have received a second supply of the Young Ladies' Journal, Family Herald, Good Words and London Society.

FASHIONABLE WEDDING AT WESTON-SUPER-MARE, SOMERSET, ENGLAND.—The marriage of Reginald Cox, Esq., second son of John Cox, Esq., only daughter of Aeneas Sage Kennedy, Esq., of The Wilderness, Hamilton, Canada, was celebrated at Trinity Church, Weston-Super-Mare, on Tuesday last. Long before the hour fixed for the wedding, the church was filled to overflowing by a highly-fashionable congregation, and hundreds who were unable to obtain admission lined the road between the house and the church. The bride—who was given away by her brother, Reginald Kennedy, Esq.—entered the church at half-past eleven. She was elegantly attired in a magnificent striped moire, richly trimmed with tulle, and orange blossoms, and veil and wreath to correspond. She wore a handsome necklace and earrings presented by her brother, and was attended by the following bridesmaids: Miss Rush (cousin of the bride), Miss Palmer, Miss Scott, Miss Norman, Miss Cox (sister of the bridegroom), Miss Matheson, Miss Lina Matheson and Miss Florence Shepherdson. Their dresses were white Swiss muslin, trimmed with tulle. The two first maids wore blue muslin, and wreaths of forget-me-nots. They were followed by three others wearing cerise bushes and azaleas, and three in white satin bushes and water lilies. All eight wore tulle veils. The bridegroom was accompanied by his cousin, Mr. Alfred Drake, who acted as best man. The groomsmen were E. Conthupe, Esq.; Edmund Blundell, Esq.; H. De C. Rawlinson, Esq. (90th Light Infantry); J. Maitland Reid, Esq.; F. Fisher, Esq.; Rev. A. Dring, and Master R. Ferrie (brother to the bride). The ceremony was performed by
